

Madam Chair and members of the committee, my name is Edie Cartwright.

Someone came to my home and offered to register me for an absentee ballot. Because I didn't know if I would feel well enough to go to the polls to vote, I filled out the paperwork.

I never received the ballot.

This bill to end same day registration, would make it harder for people like me to vote. Harder for people like me who did not receive a ballot in the mail, as we were told.

It will make it impossible for people who thought they registered when they got their driver's license and found out on voting day that the paperwork never went through.

Let's keep same day voter registration. Please vote NO on HB 30.
